

Letter of Recommendation

TO WHOMSOEVER IT MAY CONCERN

It is with utmost pride that I am supporting the candidature of Mr XXXX for the coveted Masters Slot at your eminent University. My candid recommendation is derived from close observations of his scholarly diligence while teaching him multiple disciplines during his four years of education at the Pondicherry Engineering College. XXXX has an academic predilection to study computer science and I have no doubts that he will continue in his promenade at you campus as a brilliant scholar. I am a resident professor at the college and Automata Theory and Compiler Design is my academic specialization.

XXXXX was actively involved in my lectures during his fifth semester and consummated expansive knowledge in introductory and advanced concepts of Automata Theory. As his Lab Instructor for Web technologies Laboratory (2017), he further impressed me with his intelligible inquisitiveness. Amongst his batch of 70 students; he was one of the most well prepared students in my lectures. His queries were logical and focussed on the applied scope of learning and applicative ramifications of Automata Theory. I have admired XXXX for his adjunct qualities of self-discipline and friendliness apart from his academic focus.

XXXXX excelled in his lab training in web technologies and developed a PHP project under my mentorship. He created an Online Food Ordering System using PHP and other front-end technologies developing both backend functionalities and designing the UX/UI. I was rather impressed with his quick absorption of objectives and his accomplished coding skills. He was one of the better students and ever proactive in planning and in attempts to clarify doubts of his peers. I graded him an 'S' for his attentiveness in following my instructions and astuteness in team work.

I am confident that with his sincere ambitions of excelling as a technology enabler, Harish will vehemently contribute at your university with his excellent interpersonal aptitude and extensive zeal to learn computer science.

I wish him luck and strongly recommend his candidature.

Sincerely,
XXXX
